28.12.2021 · The overarching mission of Practical Radiation Oncology is to improve the quality of radiation oncology practice. PRO's purpose is to document the state of current practice, providing background for those in training and continuing education for practitioners, through discussion and illustration of new techniques, evaluation of current practices, and publication of case reports.

14.12.2021 · Tumor assessment is best evaluated through magnetic resonance imaging (MRI) with gadolinium contrast. 2 CNS baseline imaging should be required in all patients to identify CNS disease prior to protocol therapy.

15.02.2019 · Rectal cancer is prone to local recurrence and systemic metastasis. However, owing to improvements in TNM staging and treatment, including a more widespread use of rectal MRI and increased radiologist awareness of the key rectal cancer TNM staging features, the mortality rate of rectal cancer has been declining over the past few decades in adults over 50 years of age. The study was conducted in a clinical testing cohort of 140,449 individuals (8,753 TNBC cases) who received genetic testing using a 21-gene panel (sample A). In addition, a second sample (sample B) examined gene frequency rates in a pooled consortium of 2,143 individuals using a 17-gene panel. The overall frequency of pathogenic variants in the 21 genes examined in sample A.

29.12.2021 · The mission of Urology®, the "Gold Journal," is to provide practical, timely, and relevant clinical and scientific information to physicians and researchers practicing the art of urology worldwide; to promote equity and diversity among authors, reviewers, and editors; to provide a platform for discussion of current ideas in urologic education, patient engagement, and Tumor board cases will have a maximum length of 5000 words, and are limited to 6 tables and/or figures and 60 references. A brief description of the case (limited to 50 words) is required. Historical Perspective: Update and perspective on a seminal finding initially presented in an important paper that advanced the field of gynecologic oncology.

09.12.2021 · There were 32 cases [3%] in the enzalutamide arm and 3 cases [1%] in the placebo arm. The difference between the 2 is only 2%, but it is a big deal because we're talking about deaths. In fact, there was a big discussion during the initial presentation of the data set, because there were many patients who died after discontinuing enzalutamide that were not accounted for.

13.09.2021 · Cases; Advertise; CCN; Libraries Home > Stains & CD markers > SOX10 Clinical features. Usually positive rarely positive staining in breast luminal A/B or HER2+ carcinoma (5% positive), ER-/PR- DCIS (4% positive), phyllodes tumor, fibroadenoma Specific (93%), but not very sensitive (67%) for malignant peripheral nerve sheath tumor over synovial sarcoma...

21.12.2017 · Medical Dosimetry, the official journal of the American Association of Medical Dosimetrists, is...
the key source of information on new developments for the medical dosimetrist. Practical and comprehensive in coverage, the journal features original contributions and review articles by medical dosimetrists, oncologists, physicists, and radiation therapy. At the same time, current experience with electromagnetic tracking applied to various clinical tumor sites indicates that the potential benefits of electromagnetic tracking could be significant for patients receiving radiation therapy. Daily use of these tracking systems is minimally invasive and delivers no additional ionizing radiation to the patient, and these systems can provide explicit The Duke Cancer Institute (DCI) wants to assure our patients that the safety of our patients, their loved ones, our team members and the community at large remains our highest priority. In most cases, ovarian cancer is initially managed with exploratory laparotomy to confirm the diagnosis, determine the extent of disease (surgical staging), and for tumor cytoreduction. The availability of reliable intraoperative frozen section is essential to confirm diagnosis and assist in optimal surgical decision making. Accurate staging determines both treatment and prognosis. This live Virtual Tumor Board webcast is specifically designed to meet the needs of busy clinicians who treat patients with NSCLC by providing a framework for diagnosis and management. Following presentations on current and emerging treatment options for EGFR -mutant NSCLC, the faculty will discuss a series of cases constructed to highlight key ... 24.12.2021 · The Journal of Minimally Invasive Gynecology, formerly titled The Journal of the American Association of Gynecologic Laparoscopists, is an international clinical forum for the exchange and dissemination of ideas, findings and techniques relevant to gynecologic endoscopy and other minimally invasive procedures. The Journal, which presents research, ... 01.03.1999 · Gynecologic assessment of the prepubertal girl is an essential component of preventive and diagnostic pediatric care. Routine gynecologic examination of infants and children can help prevent future health problems such as asuvovaginitis by giving the clinician the opportunity to educate parents about perineal hygiene. 1 During the annual genital ... Become a Reviewer Join Editorial Board Special Issue Proposal Propose an eBook About Journal. The Journal of Cancer Science and Clinical Therapeutics is an open access, peer reviewed journal publishes articles related to the ever expanding research on Cancer. The journal emphasis on different types cancer, novel discoveries in basic science and treatment of ... Since 1985, the International Gynecologic Cancer Society (IGCS) has been uniting the globe fighting against gynecologic cancer by contributing to the prevention, treatment and study of gynecologic cancer, as well as improvement in the quality of life among women suffering from gynecologic cancer throughout the world. The premier oncology CME resource for the latest cancer information and news, education development, and connections to physician KOLs. Topics include breast cancer, hematology, lung cancer, and other solid tumors. Participate in online CME and CME Conferences at cancerlearning.com today. The Texas Children's Hospital The Woodlands physicians provide specialty care and treatment for a variety of pediatric diseases and conditions. Our clinics are staffed by Texas Children's Hospital physicians, surgeons, therapists and clinical staff who specialize in ... Real-world Cost and Clinical Burden of Tumor Lysis Syndrome Among Patients With CLL and SLL. 12/14/2021 Kerry Rogers, MD, discusses her study on real world data regarding the cost of treatment for tumor lysis syndrome in patients with CLL and SLL, presented at the 2021 ASH Annual Meeting and Exposition. 12/14/2021 J ournal of Clinical Pathways. Conference ... Agenus discovers, manufactures and develops immuno-oncology products. The company's I-O portfolio is comprised of checkpoint antibodies, cell therapies, vaccines, and adjuvants, representing a combination of synergistic agents to deliver curative patient outcomes. 29.12.2021 · The European Journal of Obstetrics & Gynecology and Reproductive Biology is the leading general clinical journal covering the continent. It publishes peer reviewed original research articles, as well as a wide range of news, book reviews, biographical, historical and educational articles and a lively correspondence section. In many cases, Pancoast tumor treatment begins with a combination of chemotherapy and radiation therapy, which may be administered before surgery to shrink a tumor and make it easier to remove. Typically, a patient receives two or three cycles of chemotherapy and approximately six weeks of external beam radiation therapy. The University of Chicago Medicine Comprehensive Cancer Center is internationally recognized as a leader in cancer care, research and education. We are an NCI-designated Comprehensive Cancer Center, and offer the full range of treatment options for both common and rare cancers in adults and children. 17.11.2016 · Tumor genotyping revealed an ERBB2 duplication mutation in exon 20. (B) Ten cases of low-grade serous tumors were sequenced: a mean of 3 single nucleotide variants (SNV) (2.4 SNVs per Mb) per case was seen. Two KRAS G12V-mutated cases showed an additional activating PIK3CA mutation; one KRAS G12V-mutated case showed an additional BRAF. ... It can also be used to document clinical response to treatment. Tumor markers include, but may not be limited to, alpha-fetoprotein (AFP), CA 15-3/CA 27.29, CA 19-9, CA-125, carcinoembryonic antigen (CEA) and prostate-specific antigen (PSA). Tumor markers are normally measured in low quantities by cells in the body. Detection of a higher-than-normal level may indicate the presence of cancer. It is important to note that the presence of tumor markers does not confirm the diagnosis of cancer. The University of Chicago Medicine Comprehensive Cancer Center is internationally recognized as a leader in cancer care, research and education. We are an NCI-designated Comprehensive Cancer Center, and offer the full range of treatment options for both common and rare cancers in adults and children. 17.11.2016 · Tumor genotyping revealed an ERBB2 duplication mutation in exon 20. Two KRAS G12V-mutated cases showed an additional activating PIK3CA mutation; one KRAS G12V-mutated case showed an additional BRAF...
The journal draws on expertise from a variety of disciplines including pediatrics, obstetrics and gynecology, reproduction and gynecology, reproductive and pediatric endocrinology, genetics, and molecular biology. 25.12.2021 · The journal presents original contributions as well as a complete international abstracts section and other special departments to provide the most current source of information and references in pediatric surgery. The journal is based on the need to improve the surgical care of infants and children, not only through advances in physiology, pathology and surgical techniques. Clear cell carcinoma of the ovary has distinct biology and clinical behavior. There are significant geographical and racial differences in the incidence of clear cell carcinoma compared with other epithelial ovarian tumors. Patients with clear cell carcinoma are younger, tend to present at an early stage, and their tumors are commonly associated with other tumors.  

Gynecologic Oncology, an international journal, is devoted to the publication of clinical and investigative articles that concern tumors of the female reproductive tract. Investigations relating to the etiology, diagnosis, and treatment of female cancers, as well as research from any of the disciplines related to this field of interest, are published.

The neuroendocrine tumor survival rate can vary significantly from patient to patient based on the location, type and stage of the cancer. Therefore, any general statistics relating to prognosis must be viewed within a proper context and are best understood with the help of a treating physician. Is neuroendocrine cancer aggressive? In many cases, neuroendocrine tumors are not aggressive.  

Orbital neoplasms in adults may be categorized on the basis of location and histologic type. Imaging features of these lesions often reflect their tissue composition. Cavemos malformations (also known as cavernous hemangiomas), although not true neoplasms, are the most common benign adult orbital tumor. They typically appear as a well-circumscribed, ovoid lesion.
